

Flex Technologies introduces our new Carbon Canister that is designed to collect, store, and dispose of fuel vapors created in the fuel tank/fuel system. Our Carbon Canister ultimately reduces the amount of hydrocarbons released into the atmosphere.

Flex Technologies Fuel Vapor Carbon Canister Features and Benefits:

- Design to meet Stringent CARB Requirements
- Integrated Check Valve (Operating pressure of the check valve can be designed to meet your specific needs)
- Various sizes for different size Fuel Tank/Fuel System
- Attachment, Configuration and Orientation can be designed to meet your needs.

See schematic below on how Flex Technologies Carbon Canister works in relationship to the fuel system.
