

NSF & 3-A APPROVED CUSTOM TUBING

Flex Technologies, Inc. is proud to introduce our new line of tubing, the latest development in a long line of new products. This line of PVC tubing meets stringent NSF and 3-A sanitary requirements, which makes it safe for food processing as well as dairy production, processing and handling.

NSF 51 APPROVED TUBING

Our NSF 51 Series of tubing can be purchased in multiple ID/OD configurations to meet your needs. These sizes are available in a standard PVC or can be purchased with PVC. This NSF 51 approved tubing is relied upon to help ensure safety and compliance in the various food processing industries.

3-A DAIRY APPROVED TUBING

Our 3-A Standard Series of tubing can be purchased with multiple ID/OD configurations. This tubing comes in both a single tube and dual tube design to meet all dairy industry needs. All sizes and design configurations are available in a standard PVC or can be purchased with PVC. Our 3-A approved tubes help assure cleanability, bacterial treatment repeat use conditions, and processing and handling of dairy products.

Flex Technologies is the premier manufacturer of products that require both safety and durability ... high-strength, high-density hoses and components that are inherently resistant to most chemicals, cuts and damage.
